Keiko M. Orrall	*12th Bristol*
Robert L. Hedlund	*Plymouth and Norfolk*

HOUSE DOCKET, NO. 571 FILED ON: 1/13/2013

HOUSE . . . . . No. 784

By Ms. Poirier of North Attleborough, a petition (accompanied by resolve, House, No. 784) of Elizabeth A. Poirier and others that the Department of Environmental Protection be directed to revise regulations to protect and preserve the camping industry. Environment, Natural Resources and Agriculture.

The Commonwealth of Massachusetts

Resolve to protect and preserve family camping in Massachusetts.

Resolved, Whereas, the land and waters within the Commonwealth have distinct natural, architectural, archeological, recreational, economic, agricultural and other values;

Whereas, the obligation to protect the many valuable resources of the Commonwealth is shared by local, regional, state and national governments, civic organization, businesses and the general public;

Whereas, such resources can only be protected by effective planning designed to bring about the coordination and cooperation among the various levels of government, the private sector, and the general public concerning land use decisions and planning for responsible and sustainable development in a manner that protects both the environment and the economic well-being of the Commonwealth;

Whereas; tourism is an integral component of the Commonwealth's economy and family camping is a significant segment of the tourism market bringing families from all over the country as well as from other nations;

Whereas, the family camping experience is endangered as a result of unnecessary and over restricted regulations by the DEP.

It is hereby resolved, in order to protect and preserve the very popular camping experience in the Commonwealth, the Department of Environmental Protection, shall in a reasonable time period revise and rewrite regulations to protect and preserve the camping industry. New regulations will "grandfather" existing parks if the campground is not failing to protect public health, safety or environment pursuant to 310 CMR 15. New regulations will revise restricted septic flow. Volume discharge will be adjusted for seasonal use campgrounds. Regulations will also be adjusted to reasonable terms on grey water, land size and approved environmentally friendly additives.

24 The Department of Environmental Protection will in the next 30 days, meet with MACO
25 (Massachusetts Association of Campground Owners) officers to review and rewrite 310 CMR 15
26 assuring protection to public health, safety and the environment.
